

```

## PLOTING XES Maps ##
XESMap = XESMapper()

## LOADING/ADDING/SUBSTRACTING 2-D XES DATA FROM A FILE ##
## Loads 2-D XES scans data from HDF5 file
XESMap.load(config, 'filename', 'detector', arg, **kwargs)
## args = scan number to be loaded

## Loads and sums 2-D XES scans data from HDF5 file
XESMap.add(config, 'filename', 'detector', *args, **kwargs)
## *args = comma seperated list of scans to be plotted or added and then plotted

## Loads and subtracts 2-D XES scans data from HDF5 file
XESMap.subtract(config, 'filename', 'detector', *args, **kwargs)
## *args = s1, p1                                     -> The data from p1 is subtracted from s1
## *args = [s1, ..., sn], [p1, ..., pn] -> The sum of p1..pn is subtracted from the sum of s1...sn

## Loads and stitches 2-D XES scans data from HDF5 file
XESMap.stitch(config, 'filename', 'detector', *args, **kwargs)
## *args = comma seperated list of scans to be stitched

## Loads and subtracts the background from each image column
XESMap.background_1d(config, 'filename', 'detector', *args, **kwargs)
## *args = s1 -> The scan to be subtracted from all previous load/add/subtract actions
## *args = [s1, ..., sn] -> The sum of scans s1..sn to be subtracted from all previous load/add/subtract

## Loads and subtracts the image the loaded image
XESMap.background_2d(config, 'filename', 'detector', *args, **kwargs)
## *args = s1 -> The scan to be subtracted from all previous load/add/subtract actions
## *args = [s1, ..., sn] -> The sum of scans s1..sn to be subtracted from all previous load/add/subtract

## REQUIRED VARIABLES ##
## config = RIXS -> RIXS Endstation
## config = RSXS -> RSXS Endstation
## filename = hdf5 file -> Extension .h5 not needed
## detector -> MCA type detector
## NOTE: Simple math allowed with xes_stream with constants and variables, i.e. +, -, /, *

## *kwargs options ##
## norm = True                                         -> Scales the data such that its range is 0 to 1.
## xoffset = [(S1,P1),..., (SN,PN)] -> Adjusts x-axis scale to map SN to PN
## xcoffset = value                                    -> Shifts x-axis scale by a constant value
## yoffset = [(S1,P1),..., (SN,PN)] -> Adjusts y-axis scale to map SN to PN
## ycoffset = value                                    -> Shifts y-axis scale by a constant value
## grid_x = [start,stop,delta]                         -> Change x-axis grid to be uniform
## grid_y = [start,stop,delta]                         -> Change y-axis grid to be uniform
